### Friday August 10

12.45pm - 5.00pm  
4 CPD Hours

#### Dr Fritz Heitz | Specialist Periodontist

##### The importance of periodontics in implant dentistry

Periodontitis can be treated and maintained predictably using the right approach. It is becoming increasingly important to have a good understanding of all aspects of management of patients with periodontitis, with implants, or with both

#### Dr Wendy Gill | Specialist Periodontist

##### Periodontitis management in general practice: is there a benefit in subgingival airflow polishing?

The evidence regarding the use of subgingival airflow polishers in the management of periodontal patients will be analysed and the clinical applications of the system will be addressed.

#### Jennine Bywaters | Dental Therapist

##### Ergonomic considerations for the clinical practitioner

Recent evidence suggests that the majority of dental clinicians will experience a work related musculoskeletal disorder or over use injury during their career. This presentation will describe the common injury patterns and provide useful preventive strategies.

### Friday Sept 14

12.45pm - 5.00pm  
4 CPD Hours

#### Professor Camile Farah | Oral Medicine Specialist

##### Common oral pathology - How to tell them apart and what to do with them

This lecture will present diagnostic approaches and referral pathways to deal with common oral lesions. Topics to be covered include white and red lesions of the oral mucosa, common bumps and lumps, the treatment needs, and a contemporary decision making protocol for mucosal precancerous lesions.
